SUBJECT: CALCILITE - REDUCED DUSTING

In the December 1969 issued of "Asbestos", the following item appears -
"J-M announced "Thermobestos LD", a new molded pipe fitting insulation
for use with its Thermobestos pipe insulation. The new molded product
reduces dust and damage resulting from cutting and handling and provides
users with a Thermobestos insulation system requiring little or no field
fabrication."

We have discussed this type product on several occasions in the past and
have done a limited amount of laboratory toward development of such a
product.

We would be interested in seeing samples of this product. Can you arrange
to obtain such samples? Is Thermobestos LD offered at the same price as
Thermobestos? Please advise.
