Spec Ht Approx. .55 at _____ °F
 Pour Pt -45°F
 Flash Pt 300°F

I discussed possible use of Therminol 55 with these people and based on the info supplied by Don Roush it would appear to be at least equivalent. They would not accept it as an equal unless they receive approval from the cable companies, namely General Cable, Anaconda, Phelps Dodge and Okonite. Their warrantee depends upon approval from cable manufacturers.

They also have a test setup at Franklin Park, Ill., that they can use to test various fluids.

They are presently working on a new piping system and are about ready to purchase 150,000 gallons of fluid for fill. We cannot bid the job, however, because of approval detail.

ACTION REQ'D: Roder: Meet again with Williams to get names and locations of cable companies.

Determine possibility of having them test T-55 in their Franklin Park pipeline.

Confirm data on T-55 to Williams and Grosser.

Follow up potential for FR-Lo-Temp in intermediate heat exchanger.

Determine potential with other electrical companies.
