ASBESTOS CEMENT FORMULATION

This is to confirm conversation with you regarding the return to 20% asbestos in our formulation. This is to be effective Friday, April 1. This will also be on a 4 to 1 ratio of 100 lb. of 4J to 100 lb. of 60. Watch carefully the results of consistency to the return to this ratio in line with our previous experience. Will John Rhoads please see that the necessary samples at 18% total asbestos content are sent to General Research Laboratory so marked and so identified for their examination and report.
