Scapa Dryers Inc.,
P.O. Box 970,
Waycross,
Georgia, 31501,
U.S.A.

Attention: Mr. G. Potts.

Dear Sirs,

When I had the pleasure of meeting you a short time ago, you had just received the first consignment of resinated/polished ZYU.938 which had had wrongly applied to the immediate wrapping of the spools, the cautionary label required on certain shipments of asbestos products to the U.S.A.

As I mentioned at the time, this label should not have been applied to your yarn shipments and we are afraid that we are at a loss to explain why this occurred. There are certainly no instructions given to that effect and we regret that this occurred. We hope that the initial reaction to the labels has been overcome and that all is now well.

In case they are of assistance, we are attaching a copy of the O.S.H.A. regulation and reports from the Asbestos Information Association/North America.

You will note that the requirements for labels apply to unsaturated or uncoated yarns only. The regulations do not apply to yarn which has been bonded or resinated.

All yarns shipped to you are either bonded or resinated and, therefore, the cautionary notice is not required for your orders.

ENCL.

(Cont'd)

Quotations are given subject to alteration without notice. Orders and deliveries are accepted only on the express condition that we are exempted from all liability (including liability to deliver in complete order) arising from any accident or hindrance of what kindsoever beyond our control, which amounts to saying that the destination marked 123C

SCNA 04496

Scapa Dryers Ltd.,
Georgia.

Also attached is an extract from a Newsletter issued by the Asbestos Information Committee in the U.K. where they refer to the U.S. regulations. You will see that they particularly point out that labelling is not required where asbestos has been modified or "locked in" by a bonding agent, coating or binder.

We hope that these extracts prove to be of assistance should there remain any problems.

Yours faithfully,
TURNER BROTHERS ASBESTOS CO.LTD.
