Subject: FIBER PURCHASE

According to the accounting and tax departments, prior to 1975 fiber was "intercorporately" sold by Canadian Johns-Manville Asbestos, Ltd. to Johns-Manville Products Corporation which then distributed it to the plants requiring fiber. After the 1975 corporate changes, the fiber was sold by Canadian Johns-Manville to Johns-Manville Sales Corporation. Prior to 1975, Johns-Manville Sales Corporation had nothing to do with intercorporate fiber. Jim Reis is out of the office this week but R. Cole and Ed Freeman have recommended that I verify this with him.

FIBER PURCHASING - YOUR JANUARY 28, 1981 MEMO

In response to your question concerning the U.S. J-M Subsidiary that purchased fiber from outside vendors (such as Colonial Sugar and Turner and Newall), I have spoken with the Accounting, Tax, Accounting Methods and Purchasing Departments, Cess McCoy and Ann Ruddy, to determine what documentation exists to support the statement that Johns-Manville Sales Corporation purchased fiber from outside vendors. The persons that I questioned were unable to give me anything in writing as to which J-M company made purchases prior to 12-31-75; almost all persons feel strongly that Johns-Manville Products Corporation was the subsidiary making such purchases.

As you have stated to me, most of your inquiries to Don Lyons, Kim Whelan and Pete Geleta indicate it was Johns-Manville Products Corporation which made the purchases from outside vendors. I believe I would rely on Kim Whelan's affidavit stating that Johns-Manville Products Corporation is the Johns-Manville subsidiary which made U. S. purchases of fiber; he is well informed as to what companies transacted various kinds of business during the years he was with J-M.

EB/mf

Eileen - Do you have any info. as to whether J-M Products purchase fiber directly from ~~J-M~~ Canadian J-M or whether this was transferred through J-M Sales.

✓ Hank Blecker 2137

I spoke with Noel Hendry and he believes that outside vendor purchases of fiber were made by two Johns-Manville entities in the 1940's and 1950's.

Products?

1. Johns-Manville Sales Corporation made fiber purchases of amosite and blue from such companies as Colonial Sugar and Turner & Newall.
2. Canadian Johns-Manville Company would have purchased chrysotile from such sources as Bell and Asbestos Corporation.
