LABORATORY ANALYSIS REPORT

Environmental Health Laboratory
a division of CIGNA Loss Control Services, Inc.

94 Murphy Road
Hartford, CT 06114
(800) 243-4903
In CT (203) 522-3844

Laboratories in Macon, GA and Hartford, CT

To: Delia Tabak
American Cyanamid Company
1937 West Main Street
Stamford, CT 06904

Report No.: 91E1107

P.O. No.:

Date Received: 5/20/91

Date Reported: 5/20/91

Analysis: ASBESTOS IDENTIFICATION

Analytical Method: Polarized Light Microscopy with dispersion staining at 100 x
Magnification; NIOSH 9002

Sample Number	Analytical Results
91-161-1 DZBRIS 4/5	No asbestos detected
91-161-2 D. 8/10	Chrysotile Asbestos; 2%
91-161-3 DZBRIS 8/10 2/3	No asbestos detected
91-161-4 DZBRIS 8/10 3	No asbestos detected
91-161-5 DZBRIS 8/10 6	No asbestos detected
91-161-6 D. PK 4 Brown	No asbestos detected
91-161-7 D. PK 4 White	No asbestos detected
91-161-8 Spray 20 mm x 10 mm	No asbestos detected

Fine fibers (<1 um in dia.) cannot be resolved by PLM. Samples containing such fibers (eg: paint, vinyl tiles) can produce a false negative result. Confirmation can be accomplished by using TEM or SEM analyses.

Percentages given are visual estimates based on surface area.

EHL's QC procedure consists of participation in the NIST NVLAP Bulk Asbestos Identification Quality Assurance Program, duplicate analysis of 10% of all samples and biweekly blind sample exchange with our Macon, GA location. Samples were homogeneous and were not treated prior to analysis unless indicated above.

Analyst Vicki Veltre
