

May 25, 1964

Mr. H. C. Von Korff, Purchasing Agent
Price Battery Corporation
Hamburg, Pennsylvania

Dear Mr. Korff:

The publication of mine to which you refer in your letter of May 21st is a chapter in a reference work, and therefore it is not surprising that you should not have been able to find it under my name in any bibliographic listing. It is Chapter XXVI in Volume II of a work entitled, "Industrial Hygiene and Toxicology" Second Revised Edition (edited originally by Frank Patty; present editors David W. Fassett and Don D. Irish), published by Interscience Publishers, Inc. (a division of John Wiley and Sons), New York. The work is in three volumes of which Volumes I and II have been issued. Volume III is yet to appear.

It may be that you will wish to obtain this set of books. It is the best reference work of its type that is available and while it is expensive, it is worth the price. - On the other hand you may prefer to obtain only the chapter on "Industrial Lead Poisoning." As it happens, Mr. Don G. Fowler of Lead Industries Association has just obtained the consent of the publisher to have this chapter reprinted. (I received word from him to that effect only this morning.) I would suggest that you write to him and apply for a copy, which, I am sure, he will be glad to supply, when the reprinting has been completed. I am sending him a copy of this letter in order to inform him of your interest.

Very truly yours,

RAK:vr

Robert A. Kehoe, M.D.
