Dear Dave:

The response to your meeting agenda questionnaire is attached. The numbers represent the relative interest shown by those in our company who responded when the form was circulated, with a higher number representing a greater interest. If there are places where I can help with the program, I will be glad to try.

In your letter of 10 February to me you indicated agreement with participation by the Vinyl Institute Safety Subcommittee on the VCSA program. We have discussed several potential items for this part of the program and would like to suggest the following for your consideration:

1. Update on VI activities. Roy Gottesman - 15-20 minutes.
2. Update on EPA/OSHA regulatory activity relevant to VC/PVC - W. C. Holbrook - 20 minutes.
3. Results of survey of VI members on frequency and size of emergency VC discharges - myself - 20 minutes.
4. Update on current litigation on emergency discharges - Bailey Barton - 20-30 minutes.
5. Open discussion of future joint safety activities - ? - minutes.

If these are agreeable to you, and can fit into your plans, please let us know in time to finalize the presentations.

Best wishes for your planning. My wife and I are looking forward to seeing you in Phoenix.

Very truly yours,

John T. Barr
