Ha!

I should be getting royalty checks for the TPs I wrote for him years ago that they still use.

## Smith Remarks on EPA Science Boards Announcement

WASHINGTON - House Science, Space, and Technology Committee Chairman Lamar Smith (R-Texas) delivered the following statement today at the Environmental Protection Agency (EPA) headquarters following Administrator Pruitt's announcement regarding the agency's science boards.

As prepared for delivery:

**Administrator Pruitt, thank you for inviting me to be here today. This is a special occasion.**

**Today's announcement shows that we have an administrator with common sense, commitment and courage.**

**Administrator Pruitt is restoring the EPA advisory boards to their original purpose – to provide the administrator objective advice on science and technology policies.**

**For eight years, the EPA has had science boards filled with members who have had conflicts of interest.**

**It's impossible for these boards to be fair and balanced in their advice and their decisions when many board members are receiving grants and funds from the EPA.**

**Earlier this year, the House passed a Science Committee bill called the EPA Science Advisory Board Reform Act. It was introduced by Frank Lucas of Oklahoma and co-sponsored by 28 Members of Congress.**

**The legislation increases the transparency of the board and the independence of its members.**

**The goal of the legislation is to enable boards to provide unbiased scientific advice, which will help maintain their integrity.**

**Administrator Pruitt's actions today enable us to put the principles of this bill into practice.**

**Americans can thank Administrator Pruitt for advancing honest government, sound scientific opinions and a more responsive EPA.**
