

Curtis Refrigerating Machine Company

Division of Curtis Manufacturing Company

19 Kienlen Ave., St. Louis, Mo., U. S. A.

ESTABLISHED 1854

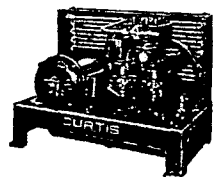

93 Condensing Units
from 1/6 to 30 hp

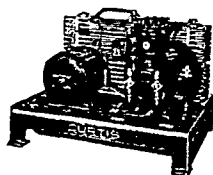

Unit Coolers and
Evaporator Coils

PRODUCTS: Refrigerating Machinery; Forced Draft Cooling Units; Cooling Coils, Condensers, Shell and Tube Coolers, Valves, Fittings and Accessories, Complete Refrigerating Equipment for Dairies, Creameries, Ice Cream Cabinets, Ice Cream Making Plants, Cold Storage Locker Systems, Walk-in Coolers, Drinking Water Systems, Commercial and Low Temperature Cooling, Processing and Air Conditioning Installation, Packaged and Remote Types.

Commercial Refrigeration

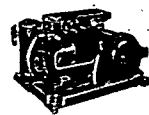

1 1/2 hp Air Cooled Condensing Unit. Other sizes from 1/4 to 5 hp.

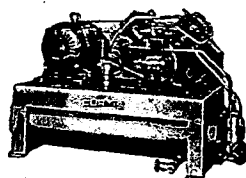

5 hp Water Cooled (Counterflow) Condensing Unit. Other sizes from 1/4 to 5 hp.

48 air cooled condensing units from 1/4 to 5 hp, inclusive, and 45 water cooled units from 1/4 to 30 hp, inclusive. All models available for either Freon (F-12) or Methyl Chloride. Mechanical advantages include Timken Bearings, Centro-Ring Positive Pressure lubrication.

Special models are available for ice cream, frozen food cabinets and for the dairy industry.

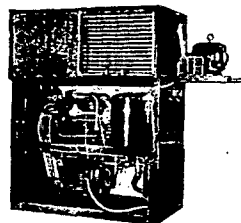

1/4 to 3/4 hp Self-Contained Condensing Unit.

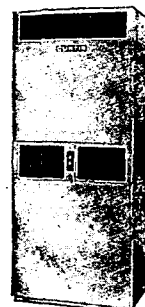

15 hp Cleanable Shell and Tube Condensing Unit. Other sizes from 5 to 30 hp.

Air Conditioning

For stores, offices and all types of commercial establishments Curtis offers complete packaged, refrigerated air conditioning units, requiring only water and electrical connections to install. Cools, dehumidifies, circulates and filters the air. Eliminates costly installation expense. Adaptable for heating.

7 1/2-10-15 ton Complete Remote or Central Type Air Conditioner.

3 and 5 ton Packaged Type Air Conditioner.

AIR CONDITIONING

We furnish complete air conditioning systems as well as refrigerating machinery for use with equipment supplied by others.

Frick Unit Air Conditioners, built in two sizes, are part of the complete line of Frick Air Conditioning Equipment.

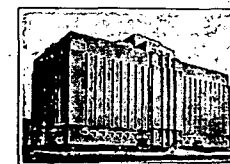

Estimates cheerfully furnished.

More than a thousand installations attest the value of the various Frick systems of air conditioning, some of which are patented, and of those made under the patents of the Auditorium Conditioning Corp. Ask for Bulletin 505, describing the five principal kinds of systems; also Bulletins 504 and 512, illustrating and listing typical jobs.

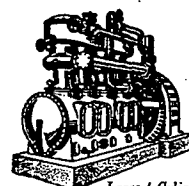

FRICK FREON-12 REFRIGERATION

Includes a complete line of enclosed type Freon-12 compressors. Large capacity, ample gas passages, pressure lubrication from internal pump, patented F L E X O - SEAL at shaft.

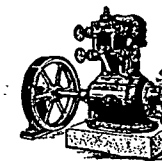

Coils, coolers, condensers and controls for Freon-12 systems. Bulletin 508.

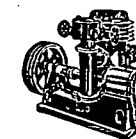

New Bankers Life Building, in Des Moines, Air Conditioned with 860 tons of Frick Freon-12 Refrigeration.

Large 4-Cylinder Compressor

Enclosed Type Ammonia Compressor

Frick Enclosed Freon-12 Compressor

Low Pressure Refrigerating Units.

AMMONIA REFRIGERATION

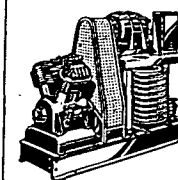

Machines in all capacities from 1/2 ton up. Combined units and vertical enclosed type compressors; complete high and low sides. Widely used for air conditioning, with material savings in power.

The Standard Caramel Company of Lancaster, Penna., has used Frick Ammonia Refrigeration for Air Conditioning Since 1910.

The Philcade and Philtower buildings in Tulsa, Okla., using 1000 tons of refrigeration, are typical of the many air conditioned with Frick ammonia systems—with important savings. Ask for Bulletins on the sizes of machines in which you are interested: Nos. 104 to 651.

LOW PRESSURE REFRIGERATION

20-Ton Freon-12 Unit for Air Conditioning Work

Commercial units in more than 50 sizes and types, with motors of 1/4 to 30 hp. Charged with Freon-12 or methyl chloride. Air and water cooled condensers. Finned coils, fan and blower units, air conditioners. Bulletins 97 and 100.

SERVICES

Offered to the industry include surveys, recommendations, literature, estimates, sales, manufacturing, installation, test and maintenance. Frick Branch Offices and Distributors are located throughout the world.
