College of Medicine
Eben Avenue
Cincinnati 18, Ohio

Dear Bob:

I assume that you have by now returned from your vacation and I trust that it was all that a vacation should be. Barring very minor sneezings-off, mine is postponed to the fall, when Elviede and I hope to get to the west for five or six weeks of combined business and pleasure.

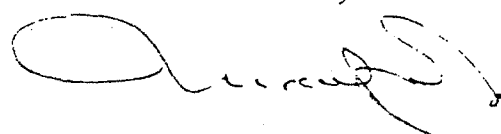

It appears that I am not the only slow mover in our organization, for we have only just received and shipped off to you yesterday the six samples of lead stabilizers referred to in my letter of July 11th. These are as follows:

Orthocinnamate and silicon gel, (C.I. Basic Lead
content (A. L. Co. Plumb-O-Sil 1)
Tribasic stearate (A. L. Co. B3-537)
Normal silylate (A. L. Co. Normal 1)
Tribasic silicate (A. L. Co. Tri-Sil)
Basic carbonate (Madsen, or)
Basic silicate (Eagle-Picher)

I would appreciate your sending me the two copies of the agreement form requested in the same letter, and I would also be interested to know how soon Dr. Suckling will be able to get his patch testing program under way.

I still lack some of the information requested in my letter of July 11th but hope to have this shortly.

Sincerely,

N35559
