Subject December Production and
 Shipping Schedules

RECEIVED
 DEC 1 19/5

File

Attached are copies of the weekly production schedules and shipping schedules for major customers by product for the month. For planning purposes, the week of December 28 is considered a week in December even though it ends in January, making five weeks for accomplishing the required production.

Ten bulk cars of SG-104 have been scheduled and they should be loaded as convenient to maximize plant output. Sixty tons of T-135-0 are included for production in the last week, but it will be postponed until January if at all possible.

We will try to keep changes to a minimum during the month.

R. E. Byrne, Jr.
