PFAS Clean Water Solutions Summit

Energy, Environment, Climate, and Sustainability Center

EVENT INVITE

Wednesday, April 2, 2025

8:00 a.m. to 12:30 p.m. EST

U.S. Chamber of Commerce Headquarters

Please join us for a series of discussions of public and private stakeholders on the practical and policy solutions to address the environmental management challenges that communities and companies are facing due to per- and polyfluorinated substances or "PFAS." The dialogue will focus on developing recommendations and actions to accelerate

cleanup of PFAS in the environment, in particular solutions for wastewater and drinking water challenges.

Please register below.

REGISTER

Outcomes:

- Develop a stakeholder leadership council of a select group of companies and other champions who are most vested in a dialogue to drive action on PFAS cleanup.
- Identify the policy and practical barriers to fostering innovation and scaling deployment of the best treatment technologies.
- Promote water reuse and recycling as among the mechanisms to treat and possibly eliminate discharges.
- Catalyze research and development in key disposal and destruction technologies.
