Industrial Hygiene - Asbestos

Dr. Vorwald, of Saranac, has just told Dr. Lanza that he hopes to have Dr. Gardner's asbestos dust data in shape for review by December 1, though he thinks there may be some slight delay beyond this point.

Dr. Lanza, Van Brown, and I will see Dr. Vorwald next week, and this will be discussed with him at that time.

Everyone understands that this will be checked by all concerned before it is published, and Van Brown is in touch with other participating companies about this. As A. R. pointed out recently, we should not forget the interests of the companies at Thetford.
