Dear Dr. Kehoe:

You are no doubt already aware, I am sure, that your Refresher Course, "The Significance of The Levels of Concentration of Lead In Body Fluids In Relation To Industrial Hygiene", was over-subscribed at the Toronto Annual Conference. We are most fortunate that you could fit this session into the demands on your time, and contribute so much to the success of the Conference.

Would you like to present the same or a similar session at the 1972 Annual Conference in San Francisco, California? The Refresher Courses, which are now given both morning and afternoon, will be presented on Monday, May 15, 1972. Can you put this on your calendar for the future?

With all the questions now being asked about the myriads of exposures to potentially toxic materials, those involved in trying to answer them will never be able to thank you enough for your tremendous contribution to the analysis of the problem and development of workable and effective control of exposures to lead (and other elements).

KE 0023021

Robert A. Kehoe, M.D.

8/11/71

If this does not catch you on vacation, or on an extended trip, might you give me a reply by September 1st? Thank you again. Your own contribution is enough, but one must also have much admiration for the other participants from Kettering who continually add so much to the understanding of and to the minimizing of potentially hazardous occupational exposures.

Sincerely yours,

WILLIAM E. SHOEMAKER, Chairman
Refresher Courses Committee
