The current inspection results were reviewed. The plant is in good shape and some units have made improvements. Competition will be keen in the future, and the quarterly inspection results are being achieved.

It was reported that our third and fourth recordable injury occurred on Monday, June 20. Bob Hammann discussed the incidents with the committee.

The Annual Inspection will be a totally in-house inspection. The time has been tentatively set for late September. There is a possibility that the Annual Inspection would be combined with the scheduled quarterly inspection. This will be reviewed in the next few weeks.
