As you know, the therminol units in Depts. 239, 248, 245 and 255 have serious fuming problems. Corrective action is needed as these are major sources of PCB air pollution.

I have asked Don Roush, who is the engineering specialist in the Functional Fluids Business Group, to come to the plant to discuss with you alternatives for solving these problems.

The meeting is scheduled for ~~9:00~~ 9:30 a.m., Monday, August 17 in the North Conference Room, Bldg. BK.
