WARNING LABEL ON KAYLO

J. F. Vyverberg - New York

The following is a copy of the notice which Johns-Manville puts on all of their cartons of calcium silicate material containing asbestos:

C A U T I O N

"This product contains asbestos fiber.

Inhalation of asbestos in excessive quantities over a long period of time may be harmful.

If dust is created when this product is handled, avoid breathing the dust.

If adequate ventilation control is not possible, wear respirator approved by U. S. Bureau of Mines for pneumoconiosis producing dust."

Ruberoid has a similar, though shorter, warning. I think it is incumbent on us to change our cartons to say "warning: contains asbestos," or some similar statement.

Your guidance please.
