TO C.L. BRADFORD CC ROGER HATTON - ST. LOUISST. LOUIS H.R. FORD - ATLANTAPERSONNEL CONTACTED: DAVE BRUNSON, P.A.; DAVE MOY, ENGINEER

TURBINOL 153: Moy informed me that we came within 3 hours being pulled out of all the Columbia Gulf Transmission systems. That the G.E. Engineer suggested by-passing the shaft driven lube oil pump before replacing the fluid. This was tried and the problem was solved. As a result, Columbia Gulf is in agreement that the problem is not an oil problem but rather a mechanical problem with the shaft driven lube oil pump in Stanton, Kentucky. Moy feels that we have considerable "homework" to do with Ingersol-Rand before Ingersol-Rand will go along with another installation using our Turbinol 153, even tho the difficulty has been demonstrated not to be our Turbinol 153.

Attention: Bradford & Hatton: I believe that Moy has his feet on the ground well enough to know what he is talking about. I would urge that we take whatever steps are necessary to "patch fences" with Ingersol-Rand.

I presented a contract to Brunson for 1972 quoting bulk prices. He appeared happy with this and will let me know his decision in a few weeks.
