

PUBLICATIONS -- Sept. 1, 1920 to Sept. 1, 1921.

C. K. Drinker: The Pathological Physiology of Blood-Cell Formation and Blood-Cell Destruction. Oxford System of Medicine, 1920, II, Chap. XV, 509-587.

C. K. Drinker and K. R. Drinker: The Physiology and Pathology of Work. Oxford System of Medicine, 1921, IV, Chap. XVII, 503-550.

C. K. Drinker and J. C. Aub: The Clinical Physiology of the Kidney. Nelson Loose-Leaf System of Medicine, 1920, IV, 651-659.

C. K. Drinker and L. A. Shaw: The Quantitative Distribution of Inert, Insoluble, Particulate Material (Manganese Dioxide) Administered Intravenously to the Cat. Jour. Exper. Med., 1921, XXXIII, 77-98.

C. C. Lund, L. A. Shaw, and C. K. Drinker: Quantitative Distribution of Particulate Material (Manganese Dioxide) Administered Intravenously to the Dog, Rabbit, Guinea Pig, Rat, Chicken, and Turtle. Jour. Exper. Med., 1921, XXXIII, 231-238.

C. K. Drinker and R. M. Thomson: Does the Magnetic Field Constitute an Industrial Hazard? Jour. Indus. Hyg., 1921, III, 117-128.

C. K. Drinker: A Useful Heart Method. Jour. Exper. Med., 1921, XXXIII, 675-676.

C. K. Drinker, F. W. Peabody, and H. L. Blumgart: The Effect of Pulmonary Congestion on the Ventilation of the Lungs. Jour. Exper. Med., 1922. (In press. Submitted for publication June 20, 1921.)

Philip Drinker: European Practice in Cellulose Acetate and Bones During the War. Jour. Ind. & Eng. Chem., 1921, XIII, 831-836.

W. O. Fenn: The Phagocytosis of Solid Particles. I. Quartz. Jour. Gen. Physiol., 1921, III, 439-464. II. Carbon. Ibid. 465-482. III. Carbon and Quartz. Ibid., 575-593.

C. K. Reiman and A. S. Minot: Absorption and Elimination of Manganese Ingested as Oxides and Silicates. Jour. Biol. Chem., 1920, XLV, 133-143.
