Subject: Shanghai Health Study Presentation to API HES GC

Team;

The SHS presentation to the API HES-GC went very well. The interest level was very high. There were a number of technical questions for which I did not know the answer, but Lorraine was there to very ably answer, thus rescuing me. The topic of the majority of questions was exposure. My response was that exposure is challenging, but that we are working hard to address those challenges. There were some questions as to the sustainability of the lab. I attach the slides that I used. Matt, would you add them to the web site?

Thank you to those who contributed to reviewing the draft slide pack. Based on that review, I believe that we should revisit the current master slide set and revise based on what we have learned since the original ones were developed. Lynn, would you please take that action?

Regards,
Patsy
