TEXAS AIR CONTROL BOARD
5555 West Loop, Suite 300
Bellaire, Texas 77401

Attn: Mr. Walter Ewing

Dear Mr. Ewing:

Please find enclosed a copy of "Air Sampling for Asbestos Fiber Concentration" report, conducted by Southwestern Laboratories, Inc., at Utex's Weimar plant on December 13, and 14, 1983. This test was conducted at the request of the EPA, who has received a copy.

As we discussed, the areas covered were the Friction House and Packing departments, that you observed during your last visit. In addition, we simulated the unloading of a shipment of Asbestos raw materials, and placing these items in our warehouse, for storage.

Also, as we discussed, during processing of this material into a finished product, the workers involved wear face masks to protect themselves from particle inhalation.

If I can be of any further assistance, please advise.

Yours Truly,

Harlow Dolch
Assistant Vice President,
