DATE: 1936 Dec 7

DOC#: RR029

DOCUMENT DESCRIPTION: Letter RE Workmen's Occupational Diseases Act
of the State Of Illinois

Chicago, December 7th, 1936

Mr. R. W. Seniff -

Referring further to my last letter of Nov. 24th to you with reference to our recent conversation regarding Workmen's Occupational Diseases Act of the State of Illinois, effective Oct. 1, 1936:

In my letter of Nov. 24th I quoted letter I had received from our Vice President dated Nov. 23rd and requested you, if you had not already done so, to make a complete survey and prepare statement, by stations, enginehouses, car departments and shops, separately, showing just what machines, equipment, etc., we are now using that come under the Act and how we are guarding against diseases from each act performed by our employees.

As you know, Mr. Chinn is chairman of the Railroad Engineering and Shop Committee and for your ready reference I attach copy of his report dated Nov. 28th concerning the first meeting held by his committee on Nov. 25th which outlines the program to be followed in making this survey.

Further for your ready reference, I am sending you herewith one set of leaflets covering nine forms of occupational diseases which no doubt will be quite beneficial to you in making your survey on the B&OCT and Alton.

Will you please hurry this matter to a completion, letting me have full report earliest possible moment.
