Mr. Albert H. Fay
Vice President, Marketing
National Gypsum Company
325 Delaware Avenue
Buffalo, New York 14202

Dear Mr. Fay:

We are presently studying health problems concerned with exposures to various types of industrial dusts.

Mr. C. B. Burnett, our President, has advised me to contact you for the purpose of determining whether you have someone with industrial hygiene, medical, or injury prevention background who will represent National Gypsum Company on our study committee.

Our committee is an informal organization comprised of representatives from General Aniline and Film (Ruberoid), Certain-teed Corporation, Flintkote Corporation, and Johns-Manville Products Corporation. We call ourselves the Asbestos Building Products Manufacturers Environmental Health Council. Our present efforts are directed toward writing a booklet of recommended health safety practices for handling and applying asbestos-cement products in the building and construction industries.

If you desire additional information concerning our activities or if you prefer to assign a National Gypsum Company representative to our committee, kindly call me at

Area Code 201 - 722-9000 Ext. 626

for further arrangements.

I plan to ask Jim merman & Represents.

Very truly yours,

C. L. Sheckler, Manager
Occupational Environmental Control
