Geo LaBorne - asked

can coatings -
all mat'l suppliers have ans.
except BASF
+ they all say, we don't use it"

he hasn't heard of PET 5

---

Ken John -
Fastens Corp - wants ans.

WZ - Ross A. - only approval needed
EL6 - if Joint Chmn assume OK

---

F. Gavin DMS use? now used

sees no particular problem
bad for eyes (c

S. Inman
50% solvents cellosolve acetate
50% ethyl acetate TLV 400
no hood

Ind. Hyg. - measure conc,
resp. both & Mgt.

Formalin - skin sensitizer
parfield warnings -
would overshadow other
things
FHSA test should be run
likely to be corrosive
would def. cause skin burns
Wouldn't predict too bad - but it is to be considered
Lotrel = 30% $H_2SO_4$

worse than the acetic acid prod.

JUN 28 1972

if guarantee no $H_2O_2$ - not E.S. bar
can't decide right now
needs Zapp or Worthy judgement

try propelled spray -
eye irrit. test

~~eg~~ spray temp -
~~what~~ atomized
4°
12°

He will think about it + call tomorrow

---

D. Glenn
Now have samples + valve drawings
Looks good
would like to see test on rabbit

---

A Arman
no part problem = water-borne aids,
H-64 - should consider changing
to 5-3
