

MAY 14 1990

SUBJECT: Asbestos Free Gaskets

May 11, 1990

TO: Mike Phillips
FEL-PRO

Your FAX of 4/19/90 on the subject matter was forwarded to me for reply. I just received it today and have no idea what took it so long to get to me. Be that as it may, attached is the list of bulk part numbers which our Mr. Bruce Cadwell prepared for you a few weeks ago. Following each number is either an "F", indicating that the item was once asbestos and has been changed to asbestos free, or an "N", indicating that the item was never asbestos. Not knowing what packaged part numbers you purchase from us, we ran a listing of our billings to Fel-Pro for calendar 1989 and came up with the following 36 part numbers which we show to be asbestos free:

CS-3292	FS-3192	HS-3155	HS-3800-W
CS-3849	FS-3235-K	HS-3192	HS-3801
CS-3898	FS-3282-VC	HS-3227	HS-3801-W
CS-3903	FS-3396	HS-3238	HS-3803
FS-1889	HS-1889	HS-3292	HS-3809
FS-3034	HS-1967	HS-3356	HS-3809-W
FS-3052	HS-3052	HS-3356-W	HS-3835-W
FS-3102	HS-3134	HS-3396	HS-3849-W
FS-3154-W	HS-3143	HS-3800	HS-3900

Two other part numbers which we invoiced to you last year are still asbestos bearing; they are FS-3350-A and HS-4807.

Unfortunately this is of little value for your purposes, it shows the status of the related bulk components as they are brought into inventory, not as they are packaged and shipped. The only way that I can answer your question is to say that you will begin to receive the asbestos free versions of these packaged sets and bulk components when we run out of asbestos bearing stock or August 1992, whichever comes first.

In accordance with the law, we will start labeling asbestos bearing product in August of 1991. We hope to have exhausted our asbestos stock by then. We will make an effort to advise you on a part number by part number basis; but, at the present time, this is all that we can tell you.

8/9-
Phillips & Mark
