Lee, Thanks for the email. I look forward to being able to share our story with you. Unfortunately, I was in D.C. last week and am now back in GA. I likely will be back in the D.C. area over the next few months at some time but would also offer to perhaps see if Atlanta may be an option for you to visit and see firsthand our team, our manufacturing and dive into details how we go about designing systems with the technology we licensed from the EPA which we refer to as NoMonia.

Let me know, otherwise I'll look forward to letting you know in advance when I will be back in D.C.

Regards, Rich

P.S. I wish you success in your new appointment and hopefully AdEdge can be a little piece of that success story.

Dear Mr. Cavagnaro,

Administrator Pruitt has asked me to meet with you regarding the good work that you do at AdEdge Water Technologies. It is my understanding that you are in Washington today and tomorrow. What would be a convenient time for you to meet? I will adjust my schedule to accommodate your schedule but if you have any flexibility I am more flexible this afternoon or tomorrow morning (Friday July 7th) before 11:00 am.

Please let me know when you wish to meet.

Respectfully,

Lee

D. Lee Forsgren

Subject: AdEdge Invitation

Sydney, I sent this email this morning to Administrator Pruitt and heard back that unfortunately he is travelling out of town tomorrow. Since we have a long history with the EPA including work on the arsenic program a decade ago and now the award I referenced below, perhaps it would be beneficial if we could invite him to visit our facility in Atlanta and see how we have grown to be international leaders on treatment technologies for Groundwater. We are a success story driven from our relationship with the EPA and our collaboration has saved communities across the U.S. millions of dollars by our technologies. I look forward to hearing back from you.

Kindly, Rich

Dear Mr. Pruitt,

AdEdge is the recent recipient of the National Federal Laboratory Consortium technology transfer award with the EPA ORD group on biological technology for ammonia removal from drinking water called NoMonia. By happenstance I need to be in Washington D.C. tomorrow and Friday and realize it is a bold request to see if you had just a few minutes to meet.

We are excited about how this technology will benefit small communities in the Midwest and the relationship of working with the EPA to bring cutting edge technology to the market. It's a great positive story and I would love to share a little bit about what is going on.

I can be reached either by email or on my cell at 770-356-8394.

Best Regards, Rich
