**Attachments:** 2008UGENERAL-014345c.pdf

Hi Bob,

Could you please forward this to the person at Hughes that has been charged with oversight on the AFFF issues in support of W1819. I think it would be prudent to go through all the current individual Mil-Spec AFFF products on the QPL and assess if there is an impact to that product via the PFOA phase-out and if so, what mitigation is planned by the mfr/supplier to address the impact. A quick little report on the results of the assessment would be very useful for us.

Thanks for the help.

Brian

Shawn and Brian,  
In case you have not seen this. The real info is in the attachment.  
Thanks,  
Ross

Will clearly impact seals/gaskets and AFFF.

Larry,

This came across my desk so I thought I would pass it on to you in case you see any opportunities for wing 6 or anticipate any problems for the Navy with this phase-out.

Sincerely,

Roger
