SUBJECT : Miscellaneous Costs Associated with Withdrawal from Aroclor Manufacture

REFERENCE :

TO : R. A. Pohl
B2SB

The following items are under consideration for estimating costs associated with discontinuance of Aroclor operations:

1. Product loss due to decontamination.

2. Disposal of tank car fleet, including decontamination, retirement, and lease costs.

3. Spare parts disposal (now in storeroom).

A rough estimate of these items indicate expenses of some $380,000. It should be understood that decontamination means reaching a level where 0.05 pounds of Aroclor remain in the last wash put on the equipment. This may not be satisfactory. A decision is required.

In addition to the above, the plant expects to have in hand by the end of June costs for:

1. Dismantling the department with the contractor keeping major pieces of equipment.

2. Dismantling with the contractor getting no equipment.

3. Decontamination of the process equipment by someone such as Dow Well to compare with estimates on in-house costs.

We will forward this information early in July.
