Subject: Subject: EPA–HQ–OAR–2015–0500; Re-Submission of Petition for Reconsideration of the Cross-State Air Pollution Rule Update for the 2008 Ozone NAAQS

Dear Administrator Pruitt,

Attached please find a petition by Western Farmers Electric Cooperative ("WFEC") for reconsideration of the final rule entitled "*Cross-State Air Pollution Rule Update for the 2008 Ozone NAAQS*," Docket No. EPA-HQ-OAR-2015-0500, 81 Fed. Reg. 74,504 (Oct. 26, 2016). The attached petition and appendices were submitted to the prior administration on December 22, 2016, within the time period specified in the Clean Air Act.

Given that the 2017 ozone season is set to begin in May, WFEC must begin making decisions about purchasing allowances and taking other actions to comply with the regulation. WFEC's requested relief in its petition includes re-allocation of allowances to its Anadarko Plant units and re-calculation of Oklahoma's state budget. WFEC would appreciate any clarity you or your team can provide on EPA's intention to act on the petition.

A hard copy of the petition, along with a CD-Rom containing both PDF and Excel versions of the appendices, also is being sent to EPA via first-class USPS mail.

Respectfully,

Megan

Megan Heuberger Berge

Weleetka	2966	6	90971	118,227	75,062	18,857	56,721									39,409	25,021	6,286	18,907	3,702

1. For each Plant, the total fuel consumption is found in EIA-923 and EIA-860 reports (Worksheet "Page 1 Generation and Fuel Data" of the workbook "EIA923_Schedules_2_3_4_5_YYYY_Final_Revision", availablea https://www.eia.gov/electricity/data/eia923/index.html)
2. For each Plant, the heat input of each reported boiler is summed, found in Air Markets Program Data available at https://ampd.epa.gov/ampd/
3. For each Plant, the heat input of each reported boiler is summed, found in EIA-923 and EIA-860 reports (worksheet "Page 3 Boiler Fuel Data" on the same workbook indicated in step 1). If already reported through CAMD, a boiler is not included in this step (th boiler is not double-counted).
4. To estimate the boiler-specific heat inputs for boilers that are not reported at a unit level, the Plant-Level Total (step 1) is reduced by the Unit-Specific Totals (step 2 and step 3), and the remaining heat input is divided by the number of unreported units

Example:

	EIA-923 Data	**CAMD Data**
Plant A Total Heat Input	100	-
Plant A Boiler 1	-	15
Plant A Boiler 2	18	20
Plant A Boiler 3	10	-
Plant A Boiler 4	-	-
Plant A Boiler 5	-	-

Step 1	Plant-Level Total	Step 2	Unit-Specific Total (CAMD)	Step 3	Unit-Specific Total (EIA)	Step 4	Unit-Specific Totals
= 100		= 15 + 20 = 35		= 10		= (100 - 35 - 10) / 2 = 27.5	

	Totals
Plant A	100
Boiler 1	15
Boiler 2	20
Boiler 3	10
Boiler 4	27.5
Boiler 5	27.5

Index

This workbook shows how the Final and Illustrative budgets for the CSAPR Update Rule were calculated

Worksheet	Description
Final Budgets and Assurance Lev	Shows calculation of Final Budgets and Assurance Levels
Final Budget Calcs	Shows calculation of Budgets based on Final Cost Threshold Runs **with Scaling Factors**
IPM TBtu and NOx	For every IPM run, state level ozone season heat input and NOX emissions from 2018 IPM run year; incremental 2017 heat input and emissions; and calculated 2017 ozone season heat input and NOx emissions
Illustrative Budget	Shows calculation of Budgets based on Illustrative Cost Threshold Runs
Summary IPM Budgets	Summary of budgets used specifically for modeling Illustrative and Final Policy Cases
Final Budgets Calcs for IPM	Shows calculation of Budgets based on Final Cost Threshold Runs *for IPM modeling purposes*
Illustrative Budget Calcfor IPM	Shows calculation of Budgets based on Final Cost Threshold Runs *for IPM modeling purposes*
2015 Historic Data for Final	2015 Historic Data used as part of the calculation of the Final budgets
2015 Historic Data For Illust	2015 Historic Data used as part of the calculation of the Illustrative budgets (data differs slightly from that used for the final budgets, as some units updated their reported data
Adjustments	Data to support minor adjustments to IPM data to account for errata.

	Budget	Variability Limit	Assurance Level

Final Budgets and Assurance Lev

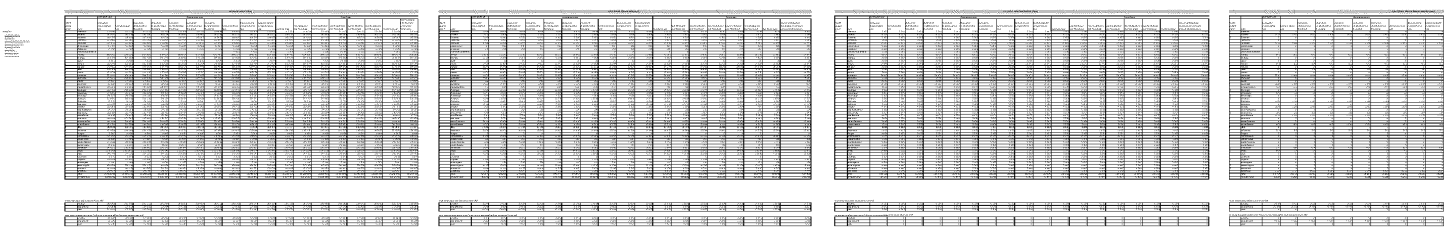

*The budget for Arkansas listed in the table is for 2018 and subsequent compliance years.
in 2017, Arkansas has a budget of 12,048 tons; a variability limit of 2,530 tons; and an assurance leve

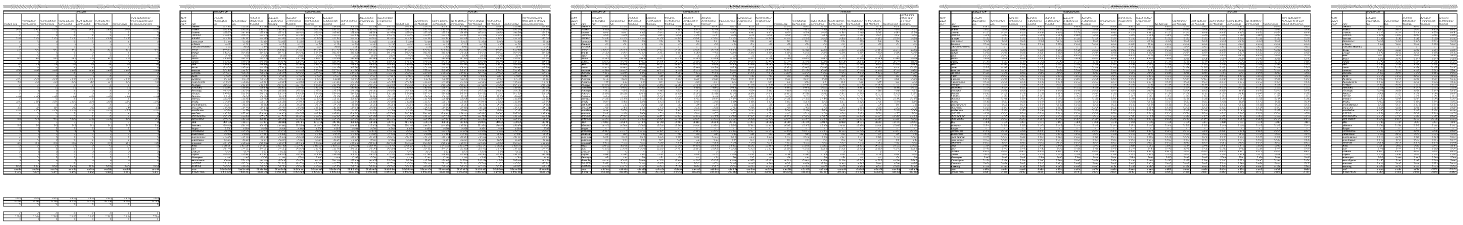

Final Budgets and Assurance Lev

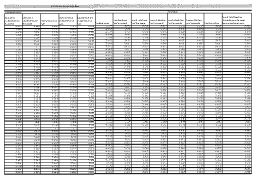

l of 14,578 tons

Summary IPM Budgets

This is a summary table of the budgets and assurance levels used in IPM to model the Illustrative and Final Policy. As discussed in the Ozone Transport Policy

(all units are in tons of Ozone Season NOx)

	Illustrative Policy Case		Less Stringent Policy Case		More Stringent Policy Case		Final Policy Case	
	Budget	Assurance Level	Budget	Assurance Level	Budget	Assurance Level	Budget	Assurance Level
Alabama	12,599	15,245	13,548	16,393	11,406	13,801	13,210	15,984
