MEDICAL DIRECTOR'S OFFICE

May 18, 1936

Dr. Robert A. Kehoe
University of Cincinnati
College of Medicine
Laboratory of Applied Physiology
Cincinnati, Ohio

My dear Dr. Kehoe:

I have just returned from a southern trip and have your letter of May 13 with the attached expense account. I am putting this expense account through by the usual channels and I am sure that it will be promptly taken care of. I had neglected to consult you on this matter when you were in Wilmington and advise you to send this account directly to me.

I wish to take this opportunity to thank you for the talk which you gave our boys and I assure you that you need not fear having spent too much time on the basic scientific background as they all enjoyed this very much and it has given them (especially those who are new men) a picture of lead poisoning and lead absorption which they did not have in the past and which they are grateful for having at the present time. As you know, there is not a single plant in our organization which is not involved in the lead question, in either a major or minor capacity, and, therefore, the subject becomes of interest to the entire group.

I, too, was very sorry that we did not have more time to

get together and talk, but our meeting did not close until long after you had left. As a matter of fact, we were literally thrown out of the meeting room in order that they might have a dinner party which was to take place in the neighborhood of six-thirty. I met Dr. Selby and Dr. Brooks in Kansas City and had the pleasure of having breakfast with them in St. Louis last week while we were en route for Nashville.

Dr. Selby explained to me at that time why it was impossible for him to be at our meeting. I enjoyed talking with him and I think that he is going to get General Motors started in the right direction. I also mentioned to him at that time the necessity of close cooperation between all of us who are trying, at least, to do the job for industry. I believe that his work will prove very interesting to all of us and he certainly has a large field to cover.

Again thanking you for your splendid cooperation and the excellent talk which you gave our group, I am

Yours very truly,

MEDICAL DIVISION

G. H. Gehrmann, M.D.,

Medical Director
