Industrial Hygiene - Asbestos
Report on Saranac Asbestos Tests
Yours 10/23

I assume that when this story is ready for review we shall have an opportunity to see it here in New York. I also would suggest that arrangements be made to have this reviewed by the top men of the Quebec Asbestos Producers Association. This group knows about this book which is going to be published, and, of course, they are very much interested in having a chance to see it before it is released.
