1982 AWARDS - NATIONAL SAFETY COUNCIL

The National Safety Council's highest award, the Award of Honor, has been won by the Du Pont Company for its safety performance in 1982. Over the 41 years the award has been offered, Du Pont has won the award 36 times.

The National Safety Council Award Plan provides four levels of awards in recognition of good industrial safety records: Award of Honor, Award of Merit, Award of Commendation, and President's Citation. These awards recognize a year (or more) of injury-free operation. The Awards of Honor and Merit can also be won with non-perfect records if performance is sufficiently above the rank and file to meet standards set by the National Safety Council.

Since the award plan was extended 32 years ago to cover individual units in addition to entire companies, our company plants, laboratories, and construction projects have won 3206 awards: 1113 Awards of Honor, 1062 Awards of Merit, 769 Certificates of Commendation, and 262 President's Citations. See attached tabulation for additional information.

We congratulate the 115 units listed on the attached page for their fine safety performance in 1982. Plaques and certificates are being mailed from Chicago.

Of the 124 units entered in National Safety Council's industry section contest, 108 were winners.
