

CARTER

Soft Paste

WHITE LEAD

Easy to
thin...
tint...
spread

Use this well-known brand of white-lead for jobs that you want to paint to stay painted. Easy to mix, convenient, time-saving—Carter Soft Paste gives a long-wearing paint that does not crack or scale but wears down smoothly, leaving a perfect surface for re-painting.

KC-387—Painter & Decorator—April, 1931 to March, 1932, inclusive

Where **RED** Signals Safety!

Red is the symbol of safety on millions of dollars' worth of iron and steel structures.

Railroad property, particularly, should be protected by red lead—Dutch Boy Red Lead. For Dutch Boy seals out corrosion, preventing rust from getting a start. It makes a paint that furnishes an elastic, durable coating which sticks tight as it protects as it wears.

Dutch Boy Red Lead is a fine, uniform, highly oxidized pigment sold in both paste and liquid forms. As a paste, it is supplied in the natural orange-red which can be readily shaded to dark colors. The liquid form comes in six colors—orange-red, two shades each of green and brown, and black.

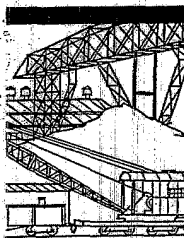

For information concerning railroad paint problems, consult our Department of Technical Paint Service. Address nearest branch.

SIGNALS
SAFETY**

DUTCH BOY RED-LEAD

● To the railroad maintenance man, "depreciation" is more than a word—it's real...a steadily working, destructive force that must be checked if valuable property is to be conserved.

Red signals safety when the red is Dutch Boy Red Lead because it protects metal structures and equipment against air and moisture—the cause of rust and corrosion.

Dutch Boy Red Lead comes in both paste and liquid forms. Dutch Boy Red Lead in oil (the paste form) comes in orange-red and can be shaded to darker colors. Dutch Boy Liquid Red Lead is supplied in five colors and black. Consult our Dept. of Technical Paint Service about metal painting problems.
