PLAINTIFF'S EXHIBIT

GP-384

We shall make Mr. Watt available for trip to Jackson to watch application of new acoustical plaster.

Watt
Mr. Watt will probably want to see the job a couple of days after it is applied to see whether it dries properly. If plastering was done on Monday or Tuesday, 19 or 20, Mr. Watt would have a day or two to spend with Jackson Sales on any problem they might have while waiting for plastering to dry. If plastering is done on August 16, he would spend the week end in Jackson and re-visit job on Monday but his free time would be of no value to Sales. However, we shall fit his schedule to suit needs on the job. Mr. Watt, is of course, in the Paoli Laboratory and Mr. Brown can reach him here.

Re: Book 66729

THIS COPY FOR

We are submitting to the plant, Book 66729 and in this shipment, we have requested shipment of two tons of our new accoustical plaster that will work by gun application.

Lathing is being done on this job today and the base coat plaster will be applied with Bestwall material this week and should be ready for accoustical application Friday, August 16th providing the material will be in Jackson by that date.

The architect is Mr. James T. Canisaro. The job is the Carmelite Monastery. This project is located on Terry road and we definitely would like to have someone from the lab or the plant present when this accoustical material is applied.

It would be my suggestion that you wait until the material has arrived in Jackson and I will contact you at Ardmore or you can tell me where I can locate Mr. Watt if his services can be made available.
