

KEENEY PUBLISHING COMPANY
6 North Michigan Avenue, Chicago 2, Ill.

Heating, Piping and Air Conditioning

This is the publication which carries the Journal of the A.S.H.V.E. in addition to its own regular editorial section. Its field is that of industry and large buildings. It is devoted to the design, installation, operation, and maintenance of heating, piping and air conditioning systems in such plants and buildings.

Each January issue includes a complete directory of commercial and industrial heating, piping, and air conditioning equipment, which lists all products, their trade names, and the manufacturers' addresses. It is the established buying and specifying guide of the industry.

H. P. & A. C. is read by consulting engineers and architects . . . contractors . . . and engineers in charge of heating, piping and air conditioning in industrial plants, and other large buildings, federal, state, and city governments, school boards, and public utilities. All A.S.H.V.E. members are subscribers.

Such coverage means, for the advertiser, consideration at all points in the selling of a heating, piping, or air conditioning product . . . consideration in its selection during the preparation of plans and specifications; in

its actual purchase for installation; in its year-round buying for operating and maintenance requirements. Without waste, the manufacturer of air conditioning products and equipment can reach through H. P. & A. C. those from whom he is seeking the necessary engineering acceptance. Write for our new booklet "A Quick Picture."

Member—A.B.P.—A.B.C. Subscription Prices—U.S. \$3 per year.
Canada, Central and So. America—\$4 per year. Elsewhere \$6 per year.

American Artisan

AMERICAN ARTISAN covers the field of warm air heating, residential air conditioning, and sheet metal contracting. Its readers are warm air heating and sheet metal contractors, dealers, jobbers, manufacturers, and public utility companies.

A special section of each issue has been devoted to air conditioning since 1932, when it first became apparent that air conditioning for homes was to be along the lines of the central forced warm air heating system. As a result of the ready adaptability of this type of heating system to all air conditioning factors, hundreds of thousands of homes today have winter air conditioning—supplied through forced warm air heating with air cleaning and humidification. Cooling apparatus can be attached to these systems readily whenever year-round air conditioning is desired.

Each January issue includes a complete directory of warm air heating, air conditioning, and sheet metal products and equipment, which lists all products, their trade names, and the manufacturers' addresses.

The key man in the residential air conditioning picture is the warm air heating and sheet metal contractor—the one man experienced in "treating air" at a central place and getting it properly distributed. And the key publication—because it reaches these key men with an information service that has made it the recognized authority on residential air conditioning practice—is **AMERICAN ARTISAN**. For full information on this field, write for a copy of "A Quick Picture."

Member—A.B.P.—A.B.C. Subscription Prices—U.S. \$3 per year.
Canada, Central and So. America—\$4 per year. Elsewhere \$6 per year.

AIR CONDITIONING - PIPING - HEATING - VENTILATION - REFRIGERATION

HEATING AND VENTILATING is a monthly publication read by engineers and contractors. These are the men who specify, install and maintain the mechanical equipment used in heating, ventilating, air conditioning and refrigeration systems of industrial, commercial and institutional buildings and residential projects. Its readers include also engineers and designers of the firms which manufacture this mechanical equipment.

The editorial content is edited to be of practical use to these engineers, and is prepared under the direction of field-

experienced professional engineers.

Generally speaking, the emphasis is on practical rather than on theoretical considerations.

Each month an original Reference Data sheet is included for permanent use in a standard binder.

Special sections are published from time to time. These sections are devoted to subjects of timely interest, such as Heat Pump, Radiant Heating, Piping, Cooling Coils, Air Sanitation, Exhaust Hoods, Air Conditioning, etc. A comprehensive Buyers Directory is published each fall.

CIRCULATION

HEATING AND VENTILATING'S total distribution (A. B. C. Report, May, 1947)—classified as follows:

Consulting Engineers (388) and Architects (132) Engineers Employed by them (430).....	950
Contractors (1,991) and Engineers Employed by Contractors (412).....	2,403
Governments and School Boards and their Engineers.....	889
Public Utility Group.....	575
Industrial Firms, their Executives, Engineers and other Employees.....	2,005
Buildings, Real Estate Management Companies, their Engineers.....	677
Manufacturers of Air Conditioning, Heating, Piping and Ventilating Equipment, Their Officials and	

Employees (843) and Designing Engineers (227).....	1,070
Manufacturers' Agents and Sales Engineering Firms (197) Sales Engineers and Salesmen (938).....	1,135
Wholesalers (143) and Dealers (517).....	660
Educational Institutions, Libraries, Technical Associations.....	458
Miscellaneous and Unclassified.....	324
	11,146
Field Staff, Correspondents, Exchanges, Advertisers, Advertising Agencies and Samples.....	589
TOTAL.....	11,735

Subscriptions to **HEATING AND VENTILATING**, 148 Lafayette St., New York 13, are \$3.00 a year.
