SUPPORTING ORGANIZATION:

National Institute of Environmental
Health Sciences
Research Triangle Park, NC 27709

SUPPORTING ORGANIZATION NUMBER(S):

Contract No:
and/or
Control No:

PROJECT TITLE:

Toxicity of 2,2',5,5'-Tetrachlorobiphenyl

INVESTIGATOR(S):

Dr. J.R. Allen

DEPARTMENT/SPECIALTY, SCHOOL OR DIVISION

Department of Pathology

PERFORMING ORGANIZATION:

Name and Address, Including Zip Code:

University of Wisconsin
Regional Primate Research Center
417 North Charter Street
Madison, WI 53706

PERIOD FOR THIS NRP:

Start Date:
End Date:
Annual Funding:

PROJECT SUMMARY:

Groups of Sprague-Dawley rats are receiving 100 ppm 2,2',5,5'-tetrachlorobiphenyl in diet for two years in a test of the compound's toxicity.

Variations in serum chemistry parameters, alterations in menstrual cycles, weight records, learning and behavioral development, and periodic tissue samples will be studied as indicators of possible toxicity.

MONS 014092

CAS Registry No.
2,2',5,5'-tetrachlorobiphenyl 35693-99-3

Sponsored by ● Toxicology Information Subcommittee ● DHEW Committee to Coordinate Toxicology and Related Programs

The bibliographic references (author, title, source) on this page have been obtained from searches of the following National Library of Medicine's on-line retrieval files: TOXLINE, CHEMLINE, MEDLINE, SDILINE, and CANCERLINE. The searches, made on the substances that are the subject of the test described in the Notice of Research Project, usually have retrieved the most recent citations from these files. Because these searches have not been exhaustive, the investigator may wish to obtain more complete searches on the test substances by searching the NLM on-line files or by contacting the Toxicology Information Response Center (TIRC) at the Oak Ridge National Laboratory, P.O. Box X, Building 7508, Oak Ridge, TN 37830 — Phone: 615-483-8611, extension 31433.
