CONSULTING: ULTRAMICROANALYSIS - MICROSCOPY - SMALL PARTICLE PROBLEMS - SOLID-STATE CHEMISTRY

4 May 1979

Mr. Donald Ferry
Charles Mathieu, Inc.
P.O. Box AM
Summit, New Jersey 07901

Dear Mr. Ferry:

Using transmission electron microscopy and selected area electron diffraction, we have analyzed a sample of talc designated as Monotel 6040, Lot #492400.

We found this talc to be platy and of excellent quality. There were no asbestiform minerals contained in this talc, neither amphiboles nor serpentines.

Thank you for consulting McCrone Associates and if you have any questions regarding this report please feel free to contact me.

Sincerely,

Gene R. Grieger
Senior Research Physicist
