SUBJECT

Safety Study

REFERENCE

TO

Distribution List

The Safety and Housekeeping Action Committee is engaged in a study of the causes of the change in our safety performance that resulted in the poor safety record--increase in serious and lost-time injuries including a fatality in August, 1977.

We are seeking input from a wide variety of sources and would like to have your comments about possible causes and appropriate corrective actions that you think we should consider in developing a new, large plant-wide safety program.

Please jot down your thoughts and send them to Bob Stuart - 0-18 by September 20, 1977.
