Dear Sir or Madam:

Vista Chemical Company's commitment to quality includes not only the assurance of a healthy and safe environment for employees and customers, but adherence to all applicable regulatory requirements as well. To meet our commitments in these areas, we are providing you with certain information on the products you purchase from us.

As required by Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986, we are providing you with the following information on the product Alfol 4 Alcohol.

Rotoflex contains toxic chemicals subject to the reporting requirements of Section 313 of SARA and 40 CFR Part 372. These chemicals are present in our product as additives which we purchase from other suppliers. Although specific concentration information is not always provided by the suppliers for these additives, we are providing you with the following information based on the information we do have from our suppliers and knowledge of our products.

Rotoflex

barium compounds	4%	maximum
zinc compounds	4%	maximum

This information is also being provided to you in a regulatory information sheet attached to the MSDS for the product. This additional information is required to remain with the MSDS and not be detached, and any redistribution of the MSDS must include copies of the notice.

We realize that the billing address may not be the location for receipt of this product, and urge you to forward this information to the appropriate site prior to their first shipment.

If you have additional questions on this product, feel free to contact me.
