

ABK METAL CASTINGS

INCREASE SERVICE LIFE
when used in wet or dry
ash handling equipment

In coal-fired stations where proper handling of abrasive ash can save dollars, no better material can be used than ABK Metal.

That's because castings of ABK Metal minimize the destructive wear of abrasive ash and clinker. The controlled structure of this hard nickel-chrome iron (500 to 700 Brinell) means that each unit lasts 4 or 5 times as long as white irons with approximately the same Brinell value in the same service... thus reducing downtime and cutting maintenance costs.

Don't let abrasion steal your operating dollars. The next time you have to replace pump casings or impellers, pipes, fittings, liners, or other parts subjected to wet or dry ash abrasion, specify castings in ABK Metal—a Brake Shoe, exclusive.

Write Dept. A for Brake Shoe's information folder on ABK Metal Castings.

MORE GRIP, LESS SLIP, LONGER LIFE

Yes, you save money with Condor V-Belts on even the toughest multiple belt drive. Straight sidewalls provide more grip, less slip, longer life. They are the smoothest running V-Belts made, because every part is precision-balanced in manufacture. This, too, means longer life. Also in special oil-, heat-, static-resisting types . . . Get the engineering facts. Ask the R/M distributor for Bulletin 6868 . . . He'll tell you, too, how you get MORE USE PER DOLLAR with R/M hose, transmission and conveyor belts.
