March 22, 1974

To: MANAGEMENT CONTACTS OF COMPANIES SUPPORTING THE VINYL
CHLORIDE RESEARCH PROGRAM

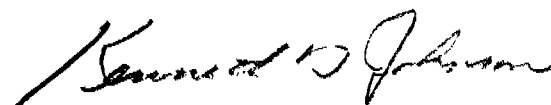

Subject: New York Academy of Sciences Symposium on
Vinyl Chloride, May 10, 1974

Gentlemen:

The New York Academy of Sciences is sponsoring a one-day meeting on health problems associated with occupational exposures in the vinyl chloride/polyvinyl chloride industry on May 10. Attendance at this meeting, which is being organized by Dr. Irving J. Selikoff, is by invitation only, and the "industry" segment of participants will be limited to about fifty. Dr. Selikoff has asked MCA to assist in the preparation of a list of candidates for invitation to this meeting. He suggests that they represent a broad cross section of industry management and expertise drawn from those with direct responsibilities for industry practices relating to the prevention and control of the health problems.

In response to Dr. Selikoff's request, we are asking that you nominate not over three persons from your company for possible invitation to this meeting. Please identify each nominee as to the area of his expertise or corporate responsibility, and the priority to be accorded his nomination, relative to those of your other nominees. Please note that an immediate response is needed, and that only one set of nominations should be submitted by each company.

Sincerely,

Kenneth D. Johnson, Ph.D.

Secretary

Technical Task Group on Vinyl
Chloride Research
