BULLETIN

ROBERT H. ECKER
SECY.-TREAS.

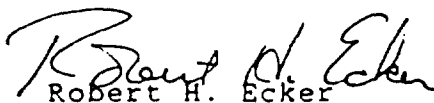

TO: All Members
DATE: November 7, 1989
SUBJECT: Fiber Symposium Book

As you know, fiber experts from North America and Europe gathered in Ponte Vedra, Florida, recently to present technical papers on Fibers for Packing and Gasket Applications. This symposium sponsored by the Technical Textile Committee of the Fluid Sealing Association (FSA) was enthusiastically received by the members.

This was the first in a series of symposia planned to bring together internationally known experts to discuss the state of the art of fiber production. The speakers representing major U.S. and European corporations stressed the physical thermal and chemical properties of various fibers. These included materials such as Ryton, PBI, cardable glass, carbon, graphite, PTFE, viscose, Nomex, and aramid. At future Symposia the FSA Textile Technical Committee plans to cover such topics as Hybrid yarns and fabrics.

A 155 page bound volume of the papers presented at Ponte Vedra is available from the FSA for \$25.00. This includes postage in the US or Canada. Add \$5.00 per book for postage to other countries). If you would like to obtain copies, please contact the FSA office.

Very truly yours,

Robert H. Ecker
Secretary/Treasurer
