Re: PROPOSITION 65

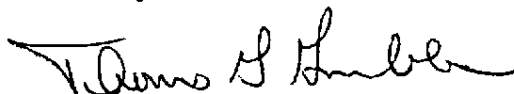

Dear Mr. Coolidge:

Attached are the chemical concentration forms you requested for Vista PVC products you purchased. Please be aware that the concentrations listed are weight percents of the additive containing the listed material and may not be the actual concentration of the Proposition 65 chemical.

In addition to the additive chemicals, Vista PVC compounds may contain trace quantities of vinyl chloride. The concentration is typically less than 1.0 ppm.

Please call me at 713-531-3445 if you have questions on this information.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager

Dear Supplier:

We are asking for your help in assisting us to comply with a relatively new law in the state of California. We refer to the Safe Drinking Water and Toxic Enforcement Act, more commonly known as Proposition 65. This law requires that individuals be warned when they may be exposed to chemicals known to the state of California to cause cancer or reproductive harm.

Attached is a listing of products that we currently purchase from you as well as a listing of chemicals currently listed under Proposition 65. We need to know if any of the listed chemicals are present in the products you sell to Electri-Flex.

Please provide the necessary information on the levels of these chemicals as soon as possible. You should note that the Proposition applies to levels much less than 0.1%

You may wish to contact the California Health and Welfare Agency at 1600 Ninth Street, Room 450, Sacramento, California 95814, (916)-445-6900 to obtain Proposition 65 regulations if you have not already done so.

Please complete and return the attached Chemical Concentration Form. Questions concerning this request may be directed to the undersigned.

Sincerely,

Daniel Coolidge
Vice President-Engineering
