General Offices

As requested, I have had sent, air mail special, to Dr. Leake analytical size samples of Aroclor 1242 (Lot AK-255), Aroclor 1254 (Lot AK-38), and Aroclor 1260 (Lot AK-3) and a copy of "Monsanto Methodology for Aroclor".

I also received a conference call from Drs. Leake, Burke and Dewey regarding the FDA procedure and ours. We discussed at length some of the details of both methods and I indicated if they needed further consultation regarding analytical methodology that they should not hesitate to contact me.

The samples of Aroclor 1254 and Aroclor 1260 standards were sent to them in case they find that they are not dealing with Aroclor 1242. The FDA had not specifically identified the "PCB's" found as Aroclor 1242 although as you indicated they are probably of the Aroclor 1242 type.

The attached letter was sent with the samples and methodology packet.

E. S. Tucker
