I don't consider myself an expert in the area of specific products, but I have read literature regarding different occupations and incidences of mesothelioma in different occupations.

Q Are you familiar from your research and training with the general types of asbestos that have been commercially used in the United States?

A Yes, sir, I am.

Q Dr. Gabrielson, as a pathologist, as part of your daily practice, are you called upon to determine if individuals have cancer?

A Yes, sir. That is something I do virtually on a daily basis.

Q As part of your hospital practice, have you been called upon to diagnose the disease mesothelioma?

A Yes, sir, I have.

Q Over the course of your practice and your career, could you estimate the number of cases of mesothelioma that you have diagnosed?

A I think that is difficult to say. Including
