

12/23/74

B L O O D L E A D S

Our overall average count continues to go down, but we still have five men over our goal of 0.07.

Generally the effort put forth by the bulk of the group is just outstanding and you are to be commended, but the wallets will be held until everyone upgrades his hygiene habits.

N O T I C E

HERE ARE THE LATEST BLOOD LEADS -- NOT A GOOD PERFORMANCE IN SOME AREAS.

THE ONLY REASON A MAN HAS A HIGH BLOOD LEAD IS BECAUSE HE DOESN'T PRACTICE PROPER HYGIENE CONTROLS.

- A. WEAR THE RESPIRATOR ALL THE TIME.
- B. CLEAN THE RESPIRATOR REGULARLY.
- C. STORE THE RESPIRATOR CLEAN IN THE PLASTIC CONTAINER.
- D. KEEP YOUR LOCKERS CLEAN.
- E. WASH THOROUGHLY AND RINSE YOUR MOUTH BEFORE EATING OR SMOKING.
- F. USE THE CLOTHES VACUUM CLEANER BEFORE ENTERING THE LOCKER ROOM.

THE WALLETS ARE STILL READY.
