BICC/UK.
CAPACITOR MANUFACTURER

H. S. Bergen - B2SL

JUL 7 RECT
J. F. Stapleton - B2SA

Sometime ago I received a copy of the attached telex from Arpino in Brussels asking for authority to confirm in writing to BICC that they could supply Aroclor to third parties who required it for compatibility testing of materials to be furnished to BICC for capacitor manufacture. Brussels proposed this be done in the understanding that BICC get these third parties to sign a similar letter to that which BICC signed as a requirement for our making continued sales to them.

_____ and I recently confirmed with Pres Cunningham that this procedure would be satisfactory. I think this gives us all the authority we need so I suggest you proceed.
