

Background:

Additional “CfE” / 2nd consultation. Not presenting individual reports as this will be too many files and too confusing. We would like to present for each sub-use:

- one overview table summarizing key information on the sub-use.
This table will be in-line with the table we have used while reading the draft WP4 reports (“Report screening information PFAS uses”); it will contain the key-parameters (if available) which will be used in the SEA
- a 10/20 page summary of each sub—use report. This word document gives a description of the sub-use, including if relevant additional data not presented in the overview table.

Goals:

1. Identify datagaps / get additional data on uses not yet covered
2. Confirmation of data (i.e. assumptions, tonnages, emissions, alternatives, costs where already mentioned, etc.) by stakeholder including academia
3. Check PFAS function
4. Possibly limit the (very high) workload in the formal public participation round
5. Impact of restriction. For this restriction different restriction options could be used. To be further worked out.

[NL] Questions

Questions per sub-us. Coordination NL; input from all.

In our view, the questions could/should mainly concentrate on the WP4 information (highlighted in yellow below) including - as suggested last time - the impact of a restriction (or other risk management measure). It would be good that we all suggest questions; some general, some specific for a sub-use. NL can coordinate.

[NL] Extract: content of the table and summary

Annex A information + emission information from Annex B + use and function of Alternatives from Annex E to be made available in the 2nd CfE / consultation.

Annex A. Manufacture and uses (incl. function of PFAS)

Annex B. Information on hazard, exposure/**emissions** and risk

Phys-chem, Grouping

Information on hazards

Exposure/**Emission**

Risk

Annex C. Justification for action on a Union-wide basis

Annex D. Baseline

Annex E. Impact Assessment

Use and function of alternatives

Hazards of Alternatives

Monitorability, Practicability

Annex F. Assumptions, uncertainties and sensitivities

Annex G. Stakeholder information

[DE] Format of the CfE:

A closed database i.e. like tax forms. We have to prevent we'll get overloaded with files. For this a database / form has to be made available or even to be build. Needs to be started soon.

Consultation 2nd CfE:

Half July – half September 2021 and announced up front.
