

1 there?

2 A Right.

3 Q Sir, did you work on each floor of the
4 hospital building?

5 A No, I don't think I did, no. I think I was
6 confined to the bottom floors, the crawl space and
7 mechanical rooms.

8 Q How many floors are you talking about?

9 A The main floor and the crawl space.

10 Q Sir, the block product, was there any area
11 you did not use the block in?

12 A Sure, the ceilings and the corridors.

13 Q Was the block product just confined to the
14 mechanical rooms?

15 A Yes, I think so. There were sterilizers
16 throughout the various parts. They blocked them in
17 and secured them into the walls where just the front
18 part was showing.

19 Q "They" meaning your fellow insulators?

20 A Yes.
